

The world of forging

# Rolex Forgings

AN ISO 9001 : 2000 CERTIFIED COMPANY

# ABOUT US

---

Established in 1995, ROLEX FORGINGS is a leading manufacturer of world-class Forgings & Forged Machine components. Starting with a medium-sized Forge Shop, we have in the span of two decades established ourselves as a reputed player in the industry. Today, we can proudly claim to be component manufacturers, catering to the OEMs of repute in the Indian markets.

Our growth in the industry is a result of our obsession with meeting customer needs on a sustained basis. Today, our services cater to the forging needs of major industry players across diverse industries with quality products at competitive prices. Our reach is the vindication of the commitment and reliability we provide to our customers.

## VISION

---

Uphold the Recognition and Reputation as value based source for World class Forged and Forged-machined Components both National and Internationally

## QUALITY POLICY

---

Our TEAM shall delight the customer by delivering Error Free Products through continuous improvements at all levels and conformance to customers requirement through effective implementation of QMS. We also shall strive to achieve Clean and Green Environment.

## INFRASTRUCTURE

---

Advanced facilities incorporating state-of-art technology are the core elements of our infrastructure , These facilities further strengthen our capabilities :

### RAW MATERIAL TESTING FACILITY

We use only certified steel for our production process and ensure that every product is checked with cutting edge equipment for accuracy and reliability. At the heart of our operations is a commitment to enhance quality on a consistent basis. We belong to a group of select companies in the Indian Forging Industry that have had their Quality Management Systems and Standards certified to be in compliance with ISO 9001:2000.

## TOOL ROOM

---

A completely equipped Tool Room with VMC duly supported by CAD/CAM Technology , Copy Die sinking machines and Electric Discharge Die sinking facilities for ensuring perfect repeatability.

## FORGE SHOP

---

Equipped with Drop Hammers and Trimming Presses along-with temperature controlled Furnaces

## MACHINE SHOP

---

Fully equipped precision machine shop with VMC's & CNC's Machining/ Turning Centers. Well supported by other allied machinery.

## QUALITY ASSURANCE

---

At ROLEX FORGINGS, our commitment to quality is centered around satisfying our customers. From the acceptance of orders to the delivery of the product, our quality control program implements stringent quality standards which complies with the customer`s specifications.

Quality at ROLEX FORGINGS is produced by people who understand their duties in terms of the job at hand ie. and the needs of customers & End-use application. The total involvement of our entire Work-force towards implementing Quality Standards parameters every level of the organisation.
